

Maki, suspension design Nendo 2011

FOSCARINI

Take two sheets of paper and roll them up together, creating something that resembles a seashell or a flower... an intuitive object both poetic and beguiling. Maki was conceived by a spontaneous natural inspiration, becoming a design product only after a challenging development process. As if made of paper, two aluminium sheets were rolled up and one slipped inside the other. Only with incisions, invisible when the lamp is assembled, could the creators obtain the proper play of light. The simple form of Maki plays with the immaterial nature of light,

integrating it as an important decorative element: the side glare is filtered by the edges of the rolled-up metallic sheets, creating a dynamic yet soft effect. While light is also cast directly down, as a soft spot beam. This dual luminous effect allows Maki to be charming all alone or in linear compositions to illuminate counters and peninsulas. The white or pale grey color choice enhances the pureness of Maki's inspiration; its lightness and poetic appeal is a luminous idea in any domestic or communal setting.

Maki, suspension technical info

FOSCARINI

Description

Suspension lamp with direct light. Diffuser consisting of two laser-cut aluminium sheets, which are rolled up and slipped into one another. The engravings on the diffusers let the light out, to delineate the contours of the two sheets with a glow of light. Transparent electrical suspension cable, ceiling flange with galvanised metal bracket and matt batch-dyed ABS cover. Canopy decentralisation kit -multiple canopy available (up to 9 suspension lamps).

Materials lacquered aluminium

Colors white, grey

Maki, suspension multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.
